

Clinical Perspectives Image List

INSTRUCTIONS FOR CONTRIBUTORS

The *JIRD*[®] Editorial Staff is looking for well documented clinical cases for possible inclusion in **JIRD Clinical Perspectives**. The editorial style of this feature includes the presentation of clinical outcomes in a visually impactful format with 15-20 clinical case photographs, radiographs and/or clinical video sequences. To ensure the highest quality resolution, please submit clinical photographs as original jpegs or tiff files in high resolution 300dpi format, 2.85w x 1.50h. The list below outlines the preferred images for submission with your **Clinical Perspectives Case Presentation** (see template).

List of Preferred Images

Surgical Photographs/Radiographs:

- Periapical radiograph(s) of pre-operative site
- Buccal view of area to receive treatment
